Wyhowski de Bukanski, B. Analysis of hexamidine, dibromohexamidine, dibromopropamidine and chlorhexidine in cosmetic products by high-performance chromatography, 283

Subject index

Ageing skin; A fully automated system to study skin surface patterns, 167

Analysis; Analysis of hexamidine, dibromohexamidine, dibromopropamidine and chlorhexidine in cosmetic products by high-performance liquid chromatograpy, 283

Antimicrobials; Surface active molecules: preparation and properties of long chain N^{α}-acyl-L-α-amino-ω-guanidine alkyl acid derivatives, 275

Antioxidants; Study of the fate of Bronopol and the effects of antioxidants on *N*-nitrosamine formation in shampoos and skin creams, 241

Biodegradation; Surfactants and the environment, 149

Biotechnology; Cosmetics – chemical technology or biotechnology, 61

Book review; *Allergic Contact Dermatitis to Ingredients used in Topically Applied Pharmaceutical Products and Cosmetics*, A. Dooms-Goossens, 145

Cell culture; Use of fibroblast cell culture for the study of wound healing drugs, 55

Cocoimidazoline derivatives; Phosphate diesters for dermatological use, 159

Collagen; Study of the thermal stability of skin collagen by differential calorimetry. Influence of a cosmetic treatment, 115

Cosmetics
- Cosmetics – chemical techonology or biotechnology, 61
- Cosmetics – functional and aesthetic? Medal Lecture 1984

Dermatology; Phosphate diesters for dermatological use, 159

Emulsification; Electrostatic emulsification of domestic and personal care products, 103

Emulsions; Stabilization of emulsions: influence of hydrophilic colloids, 177

ESR spectra; ESR study of hair and melanin–keratin mixtures – the effects of temperature and light, 71

Hair
- Effects of heat treatment on hair structure, 201
- ESR study of hair and melanin-keratin mixtures – the effects of temperature and light, 71
- The influence of heat treatment on the mechanical properties of hair, 213

Humectants; Influence of some humectants on the physical characteristics of solidified sodium stearate-based sticks, 13

Hydrophilic colloids; Stabilization of emulsions: influence of hydrophilic colloids, 177

2-Hydroxyacids; Effect of 2-hydroxyacids on guinea-pig footpad stratum corneum: mechanical properties and binding studies, 91

Image analysis; A fully automated system to study skin surface patterns, 167

Keratin fibre; The influence of heat treatment on hair structure, 201

Medal Lecture 1984; Cosmetics – Functional and Aesthetic?, 231

Melanin–keratin mixtures; ESR study of hair and melanin-keratin mixtures – the effects of temperature and light, 71

Microbiology; Bacteriological contamination of products used for skin care in babies, 85

Nitrosamine formation; Study of the fate of Bronopol and the effects of antioxidants on *N*-nitrosamine formation in shampoos and skin creams, 241

Paracrystalline phases; Viscoelastic properties of paracrystalline phases appearing in water–surface agent–oil diagrams, 131

Preservatives; Analysis of hexamidine, dibromohexamidine, dibromopropamidine and chlorhexidine in cosmetic products by high-performance liquid chromatography, 283

Processing potential; Electrostatic emulsification of domestic and personal care products, 103

Protein denaturation; The physico-chemical properties and protein denaturation of surfactant mixtures, 33

Rate curves; The interpretation of rate curves arising from membrane permeation studies, 123

Skin
- Bacteriological contamination of products used for skin care in babies, 85
- Prediction and measurement of surfactant action upon human skin under realistic conditions, 263
- Study of the thermal stability of skin collagen by differential calorimetry. Influence of cosmetic treatment, 115

Skin permeation studies; The interpretation of rate curves arising from membrane permeation studies, 123

Skin surface
- Skin surface changes after UV irradiation, 1
- Xerosis: structure of rough skin, 47

Sodium stearate-based sticks; Influence of some humectants on the physical characteristics of sodium stearate-based sticks, 13

Stratum corneum; Effect of 2-hydroxyacids on guinea-pig footpad stratum corneum: mechanical properties and binding studies, 91

Sunscreens; Major isomers of the active ingredient 5(3,3-diethyl-2-norbornylidene)-3 pentene-2-one, 187

Surfactants
Fatty acid sulphoalkyl amides and esters as cosmetic surfactants, 249
The physico-chemical properties and protein denaturation potential of surfactant mixtures, 33
Prediction and measurement of surfactant action upon human skin under realistic conditions, 263
Surface active molecules: preparation and properties of long chain N^{α}-acyl-L-α-amino-ω-guanidine alkyl acid derivatives, 275
Surfactants and the environment, 149
Taurates and isothionates; Fatty acid sulphoalkyl amides and esters as cosmetic surfactants, 249
UV irradiation; Skin changes after UV irradiation, 1
Viscoelasticity; Viscoelastic properties of para-crystalline phases appearing in water–surface agent–oil diagrams, 131
Wound healing drugs; Use of fibroblast cell culture for the study of wound healing drugs, 55
